RU-4LIFE?

Since 1969, over 4 million children have beenkilled by abortion in Canada. In 2014, another 100,000 babies will be put to death at taxpayer expense, while society turns a blind eye. Now, an old threat returns.

This year, Campaign Life Coalition is on a mission to prevent the dangerous chemical abortion pill RU-486 from entering Canada. RU-486 was developed by French pharmaceutical company Roussel Uclaf in 1986. RU-486 is a lethal drug that kills a developing human being in the womb at 5-7 weeks gestation and has a long history of serious side effects including severe bleeding and death for women who take it. We must protect our women and children. For more information visit RU-4LIFE.ca

May 7, 8 & 9, 2014 — Ottawa

Last year, an estimated 25,000 prolifers assembled on Parliament Hill and marched through downtown Ottawa to inform Canadians that we are the only western nation with no protection for the unborn. This event is a great opportunity for people of all ages to join in the civil rights movement of our day. By your presence, you can show lawmakers that the abortion issue is not settled.
