

Questionnaire for Municipal Elections (Candidates for Mayor or Council)

Please answer yes or no, attaching additional comments (if required) on a separate sheet.

1. Organizations like Planned Parenthood (PP) and its affiliate, The Canadian Federation for Sexual Health (CFSH), routinely counsel women to have abortions. Given that abortion is a controversial practice that many taxpayers in your city/municipality find abhorrent, do you agree that PP and/or CFSH should not receive taxpayer funds through the city/municipality?

(Note: Planned Parenthood is the world's largest abortion provider & abortion referral service, founded by the racist Margaret Sanger, also a supporter of the Nazi eugenics program. Elective abortions are not medically necessary, and today, are used primarily as a back-up birth control method. See Notes on next page for details.)

Yes No

Elaborate
(if desired)

2. Do you acknowledge that human life begins at conception (fertilization)?

Yes No

3. Do you consider yourself pro-life or pro-choice? (Check one only)

Pro-life Pro-choice

Explanatory Notes for the Survey Questions

QUESTION #1 NOTES

Margaret Sanger, racist & NAZI eugenics supporter:

The founder of Planned Parenthood was a racist, advancing birth control and abortion for those she deemed to be "unfit", especially targeting blacks in the United States. "More children from the fit, less from the unfit — that is the chief issue of birth control," she wrote in her 1922 book *The Pivot of Civilization*.

The magazine she founded/edited, *The Birth Control Review*, often published articles casting the Nazi eugenics program in a positive light. In 1926, the founder of Planned Parenthood proudly gave a speech to a KKK rally in Silver Lake, New Jersey.

To learn more about the racist views and Nazi connections of Margaret Sanger, read this National Review article:

<http://www.nationalreview.com/articles/224136/dark-past/jonah-goldberg>

Explanatory details about abortion as medically unnecessary:

Abortion is an **elective** procedure that is **not medically necessary, as proven by the fact that over 96%** of abortions are performed for reasons of convenience, as a back-up birth control method.

This 96%+ figure is based on U.S. public health data compiled by 6 States, and backed-up a study by the Alan Guttmacher Institute (AGI), Planned Parenthood's research arm.

U.S. data compiled by the States of Arizona, Florida, Louisiana, North Dakota, South Dakota & Utah from 1985-2007 found that reasons for abortion fell into the category of "personal choice" between 95.4% - 99% of the time. Abortions where the mother's health was cited ranged from 0.11% - 1.98%. AGI's 1987 study found rape, incest and maternal health to account for just 3.2%-4.1% of reasons why women abort.
