

**PETITION TO CANADA'S HEALTH MINISTER TO REJECT THE RU-486 CHEMICAL ABORTION PILL**

Whereas Health Canada is currently reviewing a pharmaceutical company's application to make the dangerous chemical abortion drug known as RU-486 (mifepristone) available in Canada;

And whereas Canadian trials of RU-486 were halted in 2001 after the death of a woman from toxic shock, brought on by a bacterial infection related to her chemical abortion;

And whereas the U.S. Food and Drug Administration revealed the death of 14 women in 2011 alone related to RU-486, plus hundreds of adverse effects;

And whereas in 2006, research by Regine Sitruk-Ware found that of the 1.5 million women in the United States and France who took the drug, 10 per cent experienced severe bleeding;

And whereas RU-486 has ties to the Nazi death camps of WWII, given it was designed by the same company (Hoechst AG, formerly IG Farben) which supplied Hitler with the Zyklon-B gas used to kill millions of Jews, Poles and others in the gas chambers of Auschwitz;

And whereas chemical abortions represent the unjust killing of innocent, preborn children;

**Therefore, we call upon the federal Minister of Health to immediately intervene with Health Canada to ensure that the RU-486 application is definitively rejected.**
