

Petition to Members of the Manitoba Legislative Assembly
Say NO to Becoming an Abortion Haven for the United States

We, the undersigned, are deeply concerned about Bill 211, which would protect Manitoba abortionists from prosecution for aborting U.S. babies from states where abortion is illegal.

Firstly, this bill would allow Manitoba to become a safe haven for U.S. citizens seeking abortions that are illegal in their home states. This sends a clear message the province is willing to disregard the laws and values of other jurisdictions, and potentially interfere with their internal affairs. Moreover, it could lead to a surge in "abortion tourism," which would further strain the already overburdened healthcare system in Manitoba.

Secondly, this bill is not only morally troubling, but also raises serious legal questions. Abortion is a highly divisive issue, and it is not up to Manitoba to intervene in the laws and policies of other jurisdictions. Allowing Manitoba abortion providers to operate with impunity could constitute a violation of U.S. law, and could result in diplomatic tensions with our southern neighbour.

Thirdly, we are deeply concerned about the message this bill sends to women and families in Manitoba. It suggests that the province is more concerned with advancing a political agenda than with providing genuine healthcare services to its residents. This is unacceptable, and we urge you to prioritize the well-being of Manitobans over political posturing.

Finally, Manitoba is known for its beauty, diversity, and rich cultural heritage. It should be a place where everyone, including the preborn, can thrive and be protected. Allowing foreign citizens to access abortion services that are illegal in their home states would undermine the values of Manitobans and the province's reputation as a place that is "glorious and free" for all.
