

# Abortion is an elective procedure that is **not** medically necessary

It's time to DEFUND elective ABORTION, and stop forcing Saskatchewan taxpayers to fund a lifestyle choice that kills a child in her mother's womb.

Tell your member of the legislative assembly (MLA)\* to delist abortion from the province's Medical Care Plan health insurance.

\* This pamphlet has neither been produced nor approved by the MLA identified below. It was created independently by Campaign Life Coalition Saskatchewan. We ask you to contact your MLAs and urge them to delist abortion from the MCP. Provincial legislators have the power to do so.

Contact your MLA:

FOOTNOTE: (1) Based on U.S. public health data compiled by 6 States, and a study by the Alan Guttmacher Institute (AGI), Planned Parenthood's research arm. U.S. data compiled by the States of AZ, FL, LA, NB, SD & UT from 1985-2007 found that reasons for abortion fell into the category of "personal choice" between 95.4% - 99% of the time. Abortions where the mother's health was cited ranged from 0.11% - 1.98%. AGI's 1987 study found rape, incest and maternal health to account for just 3.2%-4.1% of reasons why women abort.

THANK  
YOU  
FOR PAYING FOR MY  
MEDICALLY  
**UNNECESSARY**  
PROCEDURE

# ABORTION ON DEMAND

is covered by **your** **TAX DOLLARS**

ARE YOU  
**OK**  
WITH THAT?

## FACT

Saskatchewan taxpayers fund  
**\$2 Million**  
every year for the killing of  
children in the womb

## FACT

**Abortion** is an  
**elective**  
procedure that is  
**not** medically necessary

## FACT

**OVER**  
**96%** of abortions  
are performed for  
**convenience**  
as a back-up  
birth control method<sup>(1)</sup>

The Saskatchewan Government's twisted health care investment priorities:

### OPTION A: \$2M COULD:

- Hire 9 doctors to help fix shortage *or*
- Hire 30 nurses to reduce hospital wait times *or*
- Treat 29 additional autistic kids each year *or*
- Buy 1 more MRI machine every year *or*
- Make palliative care more accessible

**REJECTED**

### OPTION B: \$2M COULD:

Subsidize elective  
abortions which  
**kill** babies in the womb

**APPROVED**
